Any person who qualifies as an objector under section 16 of the *Pollution Control Act* may, within 30 days of the date of application, or within 30 days of the date of publication in *The British Columbia Gazette* or in a newspaper, or where service is required, within 30 days of serving a copy of the application, file with the Director at the above address an objection in writing to the granting of an amendment, stating the manner in which he is affected.

**Preamble**—The purpose of this application is to remove the laundromat effluent from the package-treatment plant and re-route it to a septic tank dry-well system which will improve the final effluent quality to the tilefields and allow better operation of the treatment plant.

Western Engineering Consultants, Box 757, Kelowna, B.C. V1Y 7P4, hereby applies for amendment(s), as described below, to Pollution Control Permit PE-5632, granted on November 2, 1979, which authorized the discharge of effluent from Lakewood Park Shopping Mall located at Winfield, B.C., to the land.

#### AMENDMENTS REQUESTED

Before: Presently, Permit PE-5632 allows for the discharge of a daily maximum of 10,000 gallons per day to the tilefield from the package-treatment plant. If a daily flow of 5,000 gallons is exceeded then a sand filter is to be installed.

After: The laundromat effluent is to be removed from the package-treatment plant, and is to be rerouted through a lint screen and septic tank for disposal in 2 dry wells located in the same area as the existing tile-

field. The removal of this effluent from the package-treatment plant will improve the final effluent quality to the tilefields and allow better operation of the treatment plant. The treatment plant will continue to handle flows up to 5,000 gallons per day and if 5,000 gallons a day flow is exceeded a sand filter is to be installed.

**NOTE**—Actual flow monitoring to date has shown a laundromat flow averaging 1,500 gallons per day which will go to the septic tank dry-well system. The addition of 2 extra washrooms is expected to increase the flow to the package plant by 500 gallons per day. The present domestic waste component of flow to the package plant is 4,800 gallons per day which gives an expected volume of 3,800 gallons per day to be treated by the package plant.
